SIDE PROJECTS

Backcountry Reporting: React/MobX app that pulls data from both NOAA and PowderLine's APIs to provide detailed backcountry conditions for specific locations. - 2018

WORK EXPERIENCE

Sr. Web Developer, ALPS Inc. - March/2017 - present - Denver, CO

My duties include but are not limited to the following

- Lead new website builds based around internal REST API
- Develop new JS modules that translate manual, repetitive HTML/Data updates into dynamic data elements built around our internal GUI/API.
- Maintenance and development of older PHP/SQL based websites
- Build complex data visualizations using D3.js

Web Developer/Designer, Self Employed - Nov/2014 - present - Denver, CO

I have and continue to work with Startups, non profits, and small/medium sized business.

- Developed custom Websites, Dashboards, eCommerce solutions, support systems, and voucher systems for a diverse range of clients
- Worked with digital marketing agencies to construct unique themes and websites for startups and local businesses
- Developed online learning modules for universities and corporate coaching companies

EDUCATION

- Boulder Digital Arts, Boulder - **PHP and JavaScript Certificate Program** - 2014
- University of Colorado, Boulder - **Economics** - 2011:
    - Econometrics, Statistics, Economic Development.
    - Economic Development - SIT Study Abroad - Santiago, Chile.
    - My applied econometrics class was my first exposure to programming using SCALA.
